

who does not take advantage of a carrier offer of the opportunity to preboard may use the area to stow his or her wheelchair on a first-come, first-served basis along with all other passengers seeking to stow carry-on items in the area.

(3) If an approved stowage area in the cabin is not available for a folding wheelchair, the wheelchair shall be stowed in the cargo compartment.

(f) When passenger compartment stowage is not available, carriers shall provide for the checking and timely return of passengers' wheelchairs and other assistive devices as close as possible to the door of the aircraft, so that passengers may use their own equipment to the extent possible, except where this practice would be inconsistent with DOT regulations governing the transportation of hazardous materials.

(1) At the request of the passenger, the carrier may return wheelchairs or other assistive devices to the passenger at the baggage claim area instead of at the door of the aircraft.

(2) In order to achieve the timely return of wheelchairs, passengers' wheelchairs and other assistive devices shall be among the first items retrieved from the baggage compartment.

(3) Wheelchairs and other assistive devices shall be stowed in the baggage compartment with priority over other cargo and baggage. Where this priority results in passengers' baggage being unable to be carried on the flight, the carrier shall make its best efforts to ensure that the other baggage reaches the passengers' destination within four hours of the scheduled arrival time of the flight.

(g) Where baggage compartment size and aircraft airworthiness considerations do not prohibit doing so, carriers shall accept as baggage battery-powered wheelchairs, including the batteries, consistent with the requirements of DOT regulations on the transportation of hazardous materials (49 CFR parts 172, 173, and 175).

(1) Carriers may require that qualified individuals with a disability wishing to have electric wheelchairs transported on a flight check in one hour before the scheduled departure time for the flight. If such a individual with a

disability checks in after this time, the carrier shall nonetheless carry the wheelchair if it can do so by making a reasonable effort, without delaying the flight.

(2) Whenever feasible, the carrier shall transport electric-powered wheelchairs secured in an upright position, so that batteries need not be separated from the wheelchair in order to comply with DOT hazardous materials rules.

(3) When it is necessary to detach the battery from the wheelchair, carriers shall, upon request, provide packaging for the batteries meeting the requirements of the DOT hazardous materials rules and package the battery. Carriers may refuse to use packaging materials or devices other than those they normally use for this purpose.

(4) Carriers shall not drain batteries.

(5) Individuals with a disability shall be permitted to provide written directions concerning the disassembling and assembling of their wheelchairs.

§ 382.43 Treatment of mobility aids and assistive devices.

(a) When wheelchairs or other assistive devices are disassembled by the carrier for stowage, the carrier shall reassemble them and ensure their prompt return to the handicapped passenger. Wheelchairs and other assistive devices shall be returned to the passenger in the condition received by the carrier.

(b) With respect to domestic transportation, carriers shall not limit liability for loss, damage, or delay concerning wheelchairs or other mobility aids to any amount less than twice the liability limits established for passengers' luggage under 14 CFR part 254.

(c) Carriers shall not require qualified individuals with a disability to sign waivers of liability for damage to or loss of wheelchairs or other assistive devices.

[55 FR 8046, Mar. 6, 1990, as amended at 55 FR 12342, Apr. 3, 1990]

§ 382.45 Passenger information.

(a) A carrier shall make available, on request, the following information concerning facilities and services related to the provision of air transportation to qualified individuals with a disability. This information shall pertain to

the type of aircraft and, where feasible, the specific aircraft scheduled for a specific flight:

(1) The location of seats, if any, with movable armrests and any seats which the carrier, consistent with this part, does not make available to qualified individuals with a disability;

(2) Any limitations on the ability of the aircraft to accommodate qualified individuals with disabilities, including limitations on the availability of boarding assistance to the aircraft, with respect to the departure and destination points and any intermediate stops. The carrier shall provide this information to any passenger who states that he or she uses a wheelchair for boarding, even if the passenger does not explicitly request the information.

(3) Any limitations on the availability of storage facilities, in the cabin or in the cargo bay, for mobility aids or other equipment commonly used by handicapped persons;

(4) Whether the aircraft has an accessible lavatory.

(b) The following provisions govern the provision of individual safety briefings to qualified individuals with a disability:

(1) Individual safety briefings shall be conducted for any passenger where required by 14 CFR 121.571 (a)(3) and (a)(4) or 14 CFR 135.117(b);

(2) Carrier personnel may offer an individual briefing to any other passenger;

(3) Individual safety briefings for qualified individuals with a disability shall be conducted as inconspicuously and discreetly as possible;

(4) Carrier personnel shall not require any qualified individual with a disability to demonstrate that he or she has listened to, read, or understood the information presented, except to the extent that carrier personnel impose such a requirement on all passengers with respect to the general safety briefing, and shall not take any action adverse to a qualified individual with a disability on the basis that the person has not "accepted" the briefing.

(c) Each carrier shall ensure that qualified individuals with a disability, including those with vision or hearing impairments, have timely access to information the carrier provides to other

passengers in the terminal or on the aircraft (to the extent that it does not interfere with crewmembers' safety duties as set forth in FAA regulations) including, but not limited to, information concerning ticketing, flight delays, schedule changes, connections, flight check-in, gate assignments, and the checking and claiming of luggage; *Provided*, That persons who are unable to obtain such information from the audio or visual systems used by carriers in airports or on aircraft shall request the information from carrier personnel. Carriers shall also provide information on aircraft changes that will affect the travel of handicapped persons.

(d) Carriers shall have, at each airport they use, a copy of this part and shall make it available for review by handicapped persons on request.

[55 FR 8046, Mar. 6, 1990, as amended by Amdt. 6, 61 FR 56423, Nov. 1, 1996]

§ 382.47 Accommodations for persons with hearing impairments.

(a) Each carrier providing scheduled air service, or charter service under section 401 of the Federal Aviation Act, and which makes available telephone reservation and information service available to the public shall make available a telecommunications device for the deaf (TDD) service to enable persons with hearing impairments to make reservations and obtain information. The TDD service shall be available during the same hours as the telephone service for the general public and the response time for answering calls shall be equivalent. Users of the TDD service shall not be subject to charges for a call that exceed those applicable to other users of the telephone information and reservation service.

(b) In aircraft in which safety briefings are presented to passengers on video screens, the carrier shall ensure that the video presentation is accessible to persons with hearing impairments.

(1) Except as provided in paragraph (b)(2) of this section, the carrier shall implement this requirement by using open captioning or an inset for a sign language interpreter as part of the video presentation.
